Technical Skills: Html, css, javascript, ReactJs(Basic), TailwindCSS(basic).

Tools & Platforms: Git & Github, canva,

EXPERIENCE

Founder and Host of ItsTechTea Workshop.

ItsTechTea Workshop

Virtual

- I have hosted a workshop of 7 plus people from tech and non-tech background.
- Taught them and help them build and deploy their website.

PROJECTS

1_ Greeting Card Web Application

Built a web application that generates personalized greeting cards with unique shareable links.

- Implemented backend logic using Java Servlets and JSP following a layered architecture (Controller ' Service ' Repository ' Model).
- Designed and integrated a MySQL database to store greeting data and retrieve messages dynamically.
- Developed a responsive UI using HTML, CSS, and JavaScript for mobile and Desktop compatibility.
- Enabled dynamic greeting page generation based on unique URLs.

2_ Halal Food Scanner

A real-time web application that scans product barcodes using the device camera and determines whether a product is Halal, Non-Halal, or Unknown based on its ingredients. Important features:

- Real-time barcode scanning using device camera
- Fetches product data from Open Food Facts API
- Analyzes ingredients for non-halal components
- Instant result display after scanning
- Simple and responsive UI

CERTIFICATES

Website Developpment

I have completed my website development course from Udemy.
